THE COMPOUND EFFECT IN BUSINESS

BRAND & **DESIGN** SYSTEM

The visual system for The Compound Effect in Business, taken from the printed jacket and the pages and trailer built for the launch: marks, colour, type, components and web standards.

GOVERNS EVERY TCEB ASSET, PRINT AND WEB

V1.0 - OCTOBER 2026

DARREN HARDY

THE LOCKUP

The primary identity is the **title lockup as printed on the jacket**: THE, COMPOUND and EFFECT stacked, with IN BUSINESS in red on its own line. It is artwork cut from the jacket file, not type. Use the supplied files only; never retype it.

WHITE · ON BLACK AND PHOTOGRAPHIC GROUNDS

BLACK · ON WHITE GROUNDS

CLEAR SPACE & MINIMUM SIZE

Keep clear space on all four sides equal to at least **the cap height of COMPOUND**. Minimum width: **160 px** on screen, **1.25 in** in print, so THE stays legible. Below that, set the title as one line of text. Artwork is 1600 px wide, cut at 600 dpi from the jacket.

DO

- White on black or photographic grounds.
- Black on white grounds.
- Keep IN BUSINESS red, smaller than EFFECT, on its own line.
- Preserve proportions and clear space.

DON'T

- Retype it in any face, the stand-in Bebas Neue included.
- Turn COMPOUND or EFFECT red or gold.
- Stretch, condense, rotate, outline or add shadows.
- Place it on mid-grey, cream or tinted grounds.
- Set it at equal weight with DARREN HARDY in one view.

LOGO VARIANTS & PARENT BRAND

Four units in a fixed order: author, franchise, book. The lockup is the identity. The franchise lockup carries the equity of two million copies. His name is set as the jacket sets it, and the DH mark closes every page.

DARREN HARDY

AUTHOR NAME · JACKET BAND

DH PARENT MARK · FOOTER

AUTHOR IMAGE

The jacket's back-flap photograph is **the approved image of Darren for TCEB**. It is also in Air. A rectangle only: never a circle, a cut-out or a new background. He sits on his own charcoal wall. On a black hero, fade the photo into black from the copy side (as on the launch pages) so he and the headline share one field.

Air · DH GO-TO PICS · dh_studio_royal_1 · 1856 × 2304

[Full-resolution file](#) · [Open the board in Air](#)

HIERARCHY RULE

The lockup leads in the hero. The DH mark sits in the footer. His name in Franklin appears only in byline positions. Two units never share one view at equal weight.

FILE NAMING

dh-name-black/white.png · author name
dh-mark-white/dark.webp · parent mark

COLOR SYSTEM

Two hard grounds, one red, and a gold that never leaves the dark. The jacket is pure black against pure white, and the hardness of that edge is the identity.

No creams, no tinted paper, no third ground.

RED ON WHITE

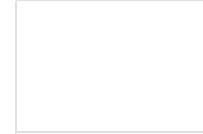

The book. White owns the book, every primary CTA, the argument and the moneylines.

GOLD ON BLACK

The dark register. On black, gold is the accent: the solid button, big numbers, stars, the glow. #D4A017 never crosses onto white.

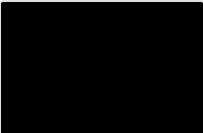

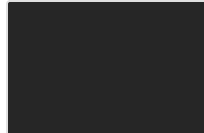

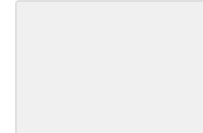

The rule that governs every page: the jacket is black, so a book page cannot be. Put the black book on white and it lands; put it on black and it disappears. That is also why the trailer ends on white.

THE ACCENT

					
Red #E1132E on white	Red bright* #FF0047 type on black	Print red C12 M100 Y92 K3	Gold† #D4A017 black only	Gold lux† #CAA76A softer register	White #FFFFFF ground

*Red bright is type only, never a button fill (white on it is 3.93:1). †Gold lives on black only: 2.38:1 on white fails at every size. Print red is the jacket's process build; the screen reds are matched for contrast, not converted from it.

NEUTRALS

					
Black #000000 web ground	Jacket black K100 · #231F20 print	Ink #262626 body on white	Grey #6E6E6E fine print	Silver #B3B3B3 body on black	Field #F0F0F0 callouts only

Greys are type tiers and rules, not grounds. The one surface allowed is Field, behind a callout or spec table. The copy seal is jacket grey #A7A5A6 and appears nowhere else.

ACCESSIBILITY

Red on white 4.85:1 and red bright on black 5.34:1 both carry body text. #E1132E on black is 4.33:1, large type only. Gold on black 8.84:1. Gold beside red at the same size vibrates (only 1.65:1 apart): separate them by size, weight or space. One red per view; long stretches with no colour are what make it land.

TYPOGRAPHY

Read off the jacket file, not assumed. Two families, used the way the jacket uses them: Bebas Neue Pro for the title, ITC Franklin Gothic for his name and the reading copy. On screen, Inter carries body and UI. Hierarchy comes from width, weight and size. Every title sample below is cut from the jacket itself.

MULTIPLY YOUR PROFITS,
YOUR PEOPLE, YOUR ADVANTAGE

WEB BODY & UI

Inter 400 / 600 / 700 · sentence case

Your business is already compounding. The only question is: **in which direction?**

LICENCE STATUS · OPEN

The files the designer sent are **Bebas Neue** (2010, not Pro) and **Franklin Gothic Book and Medium** (not the ITC Condensed and Compressed cuts). That is why the web pages have never matched the jacket. The exact cuts above went to DH on 4 Oct 2026 for a Desktop licence (MyFonts; ITC Franklin is also on Adobe Fonts). Until they are installed, the lockup and his name ship as artwork, web headlines use Bebas Neue Bold as a stand-in, and nothing is retyped to imitate the jacket.

WEB TYPE SCALE

ROLE	FACE	WEIGHT	SIZE	LINE	TRACKING	CASE
Display (one per page)	Bebas Neue Pro SemiExp	Light → Bold	clamp(42–96px)	0.94	0.02em	UPPER
Section	Bebas Neue Pro SemiExp	Bold	clamp(32–60px)	0.98	0.02em	UPPER
Card / tier (Bebas floor)	Bebas Neue Pro SemiExp	Bold	28–34px	1.0	0.03em	UPPER
Lede / body	Inter	400	17–20 / 17px	1.62 / 1.72	0	Sentence
Label / button / tag	Inter	700	11–14px	1.3	0.08em	UPPER
Fine print	Inter	400	12px	1.55	0	Sentence

Weight range, not one weight: Light carries the setup, Bold lands the one line that must land. **Bebas never below 28px:** it turns spindly, so labels and buttons are Inter 700. **ALL CAPS: eight words maximum**, six preferred. Franklin Demi Condensed is for his name only.

BUTTONS & UI MARKS

Two CTA styles. Uppercase Inter 700, 2 px radius (near square, like the jacket), one primary action per view. On white the solid is **red**; on black the solid is **gold** with black type.

GET ON THE LIST →

Solid · red fill, white type. A soft neutral shadow, no darker edge.

SEE THE BOOK →

Ghost · ink outline and type. Fills ink on hover, type flips white.

RECURRING MARKS

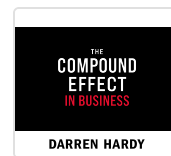

The small repeated elements that carry the brand. There is no icon library; these are the signatures.

COPY SEAL · JACKET GREY

OWNERSHIP.

THE RED PERIOD

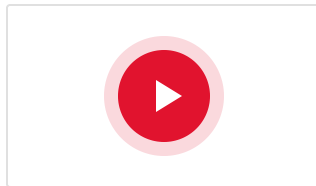

THE BAND

PLAY BUTTONS

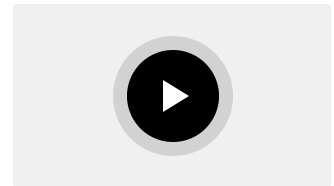

GOLD · ON BLACK

RED · ON WHITE

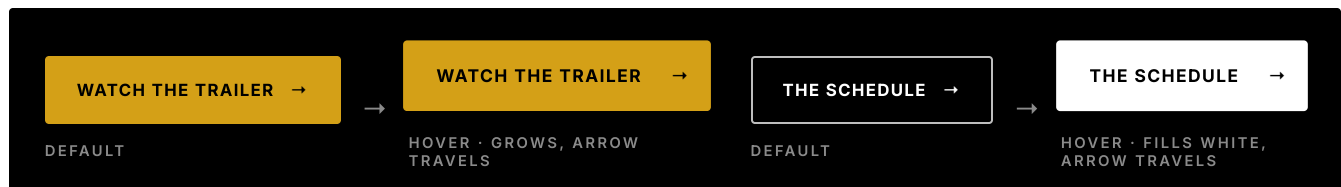

WHITE · ON PHOTO OR VIDEO

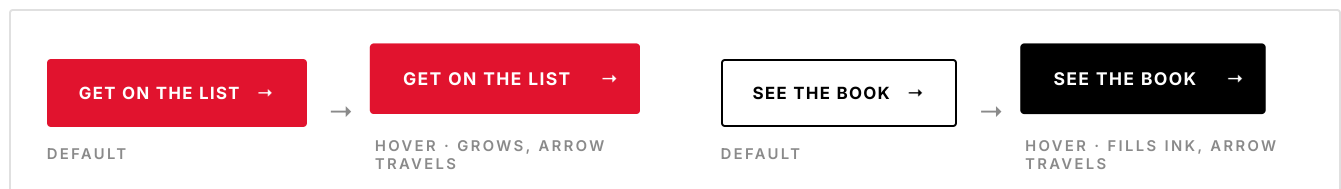

INK · ON LIGHT FIELDS

Every play button is a disc with a halo ring in its own colour that grows on hover. Gold on black may add a warm glow behind it. Pick the colour by ground, as with the CTAs. Video never loads with the page: the play opens a lightbox, the player is created on click and removed on close (youtube-nocookie, Vimeo dnt=1).

BUTTON STATES · BLACK GROUND

BUTTON STATES · WHITE GROUND

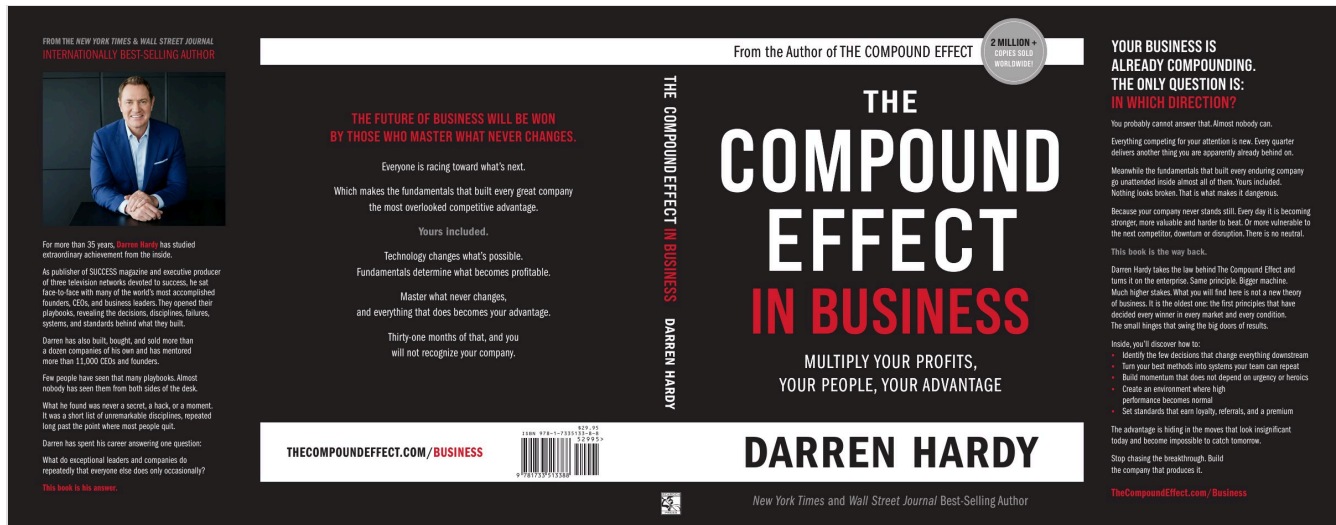

Nothing darkens on hover. A solid holds its fill: it grows about 4%, lifts 3 px and the arrow travels. A ghost fills with its own type colour and flips the type to the ground.

COMPONENTS & TREATMENTS

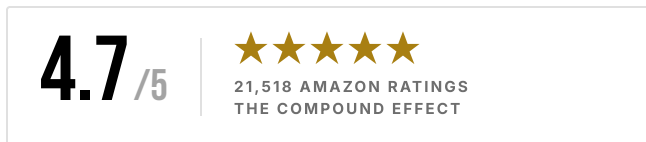

The repeatable building blocks, as built on the launch pages and in the trailer.

THE JACKET · R4, FULL SPREAD

Back flap, back, spine, front, front flap: the source of every mark, colour and face here. TCEB–Cover–R4–Jacket .pdf, page 1.

RATING LOCKUP · AMAZON

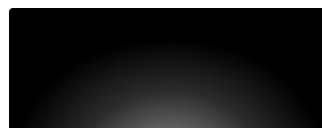

Always name the career answering one question: these are the 2010 book's ratings and never attach to TCEB's own claims. Read 4 Oct 2026; re-check before each use. Stars: ink-gold #A87F12 on white, gold on black.

THE GLOW · BACKGROUND ONLY

GOLD · ON BLACK

SILVER · ON BLACK

RED · ON BLACK

SHADOW · ON WHITE

Gold from below is the signature (in the trailer, the audience). Silver is the neutral light on black. Red glows on black only, fading through deep red, never clear. On white a glow becomes a shadow; never a red glow on white (it turns pink).

ELEVATION

Borders over shadows on cards. Real shadows only under objects (the book, a solid button's lift). 2 px radius, near square like the jacket; circles only for play buttons and the seal.

CREDENTIAL BAND · GOLD ON BLACK

Open-ended credentials only. Numbers count up once on entry.

MOTION & THE BOOK

Arrivals rise 38 px over 0.9 s. Black to white is the signature transition, and the pace compounds toward the reveal. The book is a real hardback that **always faces the copy**.

WEB IMPLEMENTATION

The tokens to build from. Reference variables; never hard-code raw hex inside a component. The live `tceb.css` still carries the pre-jacket red `#E02826`: swap it for `#E1132E` on its next pass.

```
/* Design tokens. The :root every TCEB page reads */
:root {
  /* grounds */
  --c-white:#ffffff; --c-black:#000000; --c-ink:#141414; --c-surface-d:#131313;
  /* zone 1, the book: red. one per view */
  --c-red:#e1132e; --c-red-bright:#ff0047; /* bright = type on black only */
  /* the dark register: gold. black grounds only */
  --c-gold:#d4a017; --c-gold-lux:#caa76a; --c-gold-ink:#8a6300; /* only gold allowed on white */
  /* type. Pro + ITC once licensed; stand-ins stay as fallbacks */
  --font-display:'Bebas Neue Pro','Bebas Neue','Oswald',sans-serif;
  --font-name:'ITC Franklin Gothic Std','Archivo Narrow',sans-serif;
  --font-body:'Inter',-apple-system,'Segoe UI',sans-serif;
  --radius:2px; --container:1080px; --gutter:32px;
}
```

LAYOUT & SPACING

Container max **1080 px**; side gutter 32 px desktop, 20 px mobile. Sections breathe at 120–160 px on desktop; a uniform 72 px on mobile. Mobile is its own design: sticky bottom action bar, bottom-sheet modals, snap-scrolling card rails, 44 px touch targets.

ACCENT LOGIC (LOAD-BEARING)

Red on white, gold on black. Components never hard-code a ground: they read `--fg`, `--surface`, `--accent`, which flip inside `.ground-black` and `.on-dark`.

ACCESSIBILITY

Body at 4.5:1 or better. Visible focus, real alt text, prefers-reduced-motion honoured. Scroll reveals must leave everything visible if the observer never fires.

PERFORMANCE

Self-host every font as woff2 (no Google Fonts, no CDN). WebP, sized to at most 2× its rendered box. Lazy-load below the fold. Video only on click. Every page noindex until it launches.

ANY BLACK SECTION

Black ground, gold accent. Add the dark class to the section, never only a dark background (that gives dark-on-dark type).

```
.ground-black, .on-dark { /* black ground, gold accent */
  --bg:var(--c-black); --fg:var(--c-white); --accent:var(--c-red-bright); --gold-type:var(--c-gold);
}
em { font-style:normal; color:var(--accent); } /* gold em on black */
```

EMPHASIS & WORD CRAFT

How words earn weight without italics. Two mechanics only: a colour shift and a weight shift. Both apply at headline and body size.

RULE 1 · NEVER ITALICS

The `<em>` element marks emphasis semantically; its italic is overridden. The one inherited exception is publication names in fine print, as the jacket sets *New York Times*.

RULE 2 · ONE COLOUR SHIFT PER HEADLINE

Emphasis renders red on white, red bright on black, and gold where the section is black. One per headline, one per view where possible. The jacket spends its red on a single phrase per surface; that discipline is why it lands.

RULE 3 · LIGHT SETS UP, BOLD ANSWERS

The weight shift carries the argument. The setup is light; the answer is bold. Proven in the trailer: the question types in light and the turn lands in bold.

WHAT ABOUT
MY BUSINESS?

RULE 4 · THE RED PERIOD

A short statement may end on a red full stop. It is the smallest dose of the accent, so it can sit on a line that already has no other colour. Never alongside a red word in the same line.

IT COMPOUNDS.

RULE 5 · PUNCTUATION OUTSIDE THE EM

`<em>In Business</em>.` not `<em>In Business.</em>` When two phrases share a connector, each gets its own em and the connector stays neutral. The red period is the only punctuation that is coloured, and it is the em.

RULE 6 · THE COPY RULES TRAVEL WITH THE TYPE

- No em dashes, anywhere, comments included.
- Customers invest. Transaction verbs never appear.
- "Leader," not "owner." Never open on the reader's problem.
- ALL CAPS: eight words maximum.
- Credentials stay open-ended: "more than 35 years," never an exact count.
- Never promise a number, a growth rate or a timeline.

BRAND TERM PROTECTION · .NOBREAK

Multi-word marks never break across lines: The Compound Effect, IN BUSINESS, Darren Hardy, BMC|COLLECTIVE.

```
em { font-style:normal; color:var(--accent); }      /* colour only, never slant */
.answer { font-weight:700; } .setup { font-weight:300; }
.stop { color:var(--accent); }                      /* <span class="stop">.</span> */
.nobreak { white-space:nowrap; }
```

CTA SYSTEM

Two button variants share identical dimensions and motion; only the paint differs. Use them deliberately, based on what the moment asks of the visitor.

.BTN-SOLID · DEMANDS ACTION

Filled: red with white type on white grounds, gold with black type on black. One flat fill, lifted by a soft neutral shadow. The **primary** or **closing** CTA, one per view: the final commit point of a page.

.BTN-GHOST · INVITES WITHOUT PRESSURE

Outlined in the ground's type colour. On hover it fills with that colour and the type flips to the ground. For the nav and secondary slots, where presence matters more than the click.

```
/* Shared dimensions, font, padding, motion */
.btn-solid, .btn-ghost {
  display:inline-flex; align-items:center; gap:14px;
  padding:20px 36px; border-radius:var(--radius); border:1.5px solid transparent;
  font-family:var(--font-body); font-weight:700; font-size:13px;
  letter-spacing:.08em; text-transform:uppercase; text-decoration:none;
  transition:transform .22s cubic-bezier(.2,.8,.2,1), box-shadow .22s;
}
/* Only the paint differs. The fill never changes on hover. */
.btn-solid { background:var(--c-red); color:#fff; box-shadow:0 10px 22px rgba(0,0,0,.16); }
.on-dark .btn-solid { background:var(--c-gold); color:#000; box-shadow:0 10px 22px rgba(0,0,0,.5); }
.btn-solid:hover { transform:translateY(-3px) scale(1.04); }
.btn-solid:active { transform:translateY(5px); transition-duration:60ms; }
.btn-ghost { background:transparent; color:var(--fg); border-color:var(--fg); }
.btn-ghost:hover { background:var(--fg); color:var(--bg); }
/* The arrow travels on both */
.btn-solid .arw, .btn-ghost .arw { transition:transform .22s; }
.btn-solid:hover .arw, .btn-ghost:hover .arw { transform:translateX(6px); }
```

A page can host both: a ghost in the nav (a low-pressure invite) and a solid at the close (the actual decision). Every button carries the → arrow, which travels 6 px on hover. Never two solids in one view, never a coloured glow under a button (a blurred red shadow reads pink), never a pill shape, and never a label in Bebas at button size.

NOTE ON THE LIVE STYLESHEET

tceb.css still darkens .btn-red on hover (to --c-red-deep). That predates the rule above and should be brought into line on the next pass of the stylesheet.

THE COMPOUND EFFECT IN BUSINESS

MULTIPLY YOUR PROFITS,
YOUR PEOPLE, YOUR ADVANTAGE

DARREN HARDY

New York Times and Wall Street Journal Best-Selling Author

Every asset that carries this title should feel as **deliberate, hard-edged and certain** as the jacket it comes from. When in doubt: a white ground, the black book, one red.
