

---

# BRAND & DESIGN SYSTEM

The BMC | COLLECTIVE visual system as built — logo, color, type, components, and web-implementation standards, taken directly from the live site.

# THE LOCKUP

The primary identity is the **BMC | COLLECTIVE lockup** — the Darren Hardy / Business Master Class seal, a divider, and the COLLECTIVE wordmark. Use the supplied artwork only; never rebuild it.

WHITE — ON DARK / PHOTOGRAPHIC BACKGROUNDS

BLACK — ON LIGHT BACKGROUNDS

## CLEAR SPACE & MINIMUM SIZE

Keep clear space around the lockup equal to at least **half the height of the seal** on all sides. Minimum width: **160 px** on screen so the seal text stays legible. On the site it renders crisp at large scale (artwork is 2030 px wide).

## DO

- White on dark or photographic backgrounds.
- Black on light backgrounds.
- Preserve proportions and clear space.

## DON'T

- Recolor, add gradients, shadows, or outlines.
- Stretch, condense, rotate, or crop the seal.
- Place white on light or black on dark.
- Rebuild or rearrange the seal and wordmark.

# LOGO VARIANTS & PARENT BRAND

Three logo units. The combo lockup is the full identity. Each sub-brand has its own mark. The parent DH logo appears in the footer of every BMC property and establishes the hierarchy.

COMBO LOCKUP · PRIMARY IDENTITY

BMC MARK

THE COLLECTIVE®

THE COLLECTIVE WORDMARK

DH PARENT MARK · FOOTER

## HIERARCHY RULE

BMC|COLLECTIVE is the primary brand identity. The DH parent mark appears in the footer and on print materials — it is not placed in the hero or nav of BMC pages.

## FILE NAMING

BMC\_COLLECTIVE\_logo\_white.webp — combo

BMC\_logo\_white.webp — BMC mark

THE\_COLLECTIVE\_logo\_white.webp — TC

dh\_logo.webp — parent DH mark

# COLOR SYSTEM

A near-monochrome, dark foundation with **one** chromatic accent applied sparingly. Premium comes from restraint, not decoration.

## CYAN ON DARK

Accent, emphasis, em. key, titles, play buttons & ghost CTAs live on dark surfaces.

## PLUM ON LIGHT

The same accent idea, re-hued so it reads premium on light. Emphasis & titles on bone/white.

**The one rule that governs the page:** Cyan reads loud and washed-out on light; plum reads premium there (and would vanish on dark). Same idea, two hues.

### THE ACCENT

|                                                                                   |                                                                                   |                                                                                   |                                                                                    |                                                                                     |                                                                                     |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |  |  |  |  |
| <b>Cyan</b><br>#78E4EF                                                            | <b>Plum</b><br>#4B2C6A                                                            | <b>Purple*</b><br>#9C27AC                                                         | <b>Magenta*</b><br>#D62A8F                                                         | <b>Gold†</b><br>#F5B301                                                             | <b>White</b><br>#FFFFFF                                                             |

\*Purple & Magenta — ambient background *wash* only (low-opacity radial). †Gold — **review stars only**; never type or UI.

### NEUTRALS

|                                                                                     |                                                                                     |                                                                                     |                                                                                      |                                                                                       |                                                                                       |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |  |  |  |  |
| <b>Black</b><br>#0A0A0A                                                             | <b>Ink</b><br>#141414                                                               | <b>Surface</b><br>#0E0C12                                                           | <b>Silver</b><br>#B8B8B8                                                             | <b>Grey-soft</b><br>#6A6A6A                                                           | <b>Bone</b><br>#F5F5F5                                                                |

Dark backgrounds → Black / Ink / Surface. Light backgrounds → Bone / White. Body text → Silver (on dark) / Muted #444 (on light). Hairlines use low-opacity white (on dark) or black (on light).

### ACCESSIBILITY

White & Silver on Black/Ink pass AA. Ink/Muted on Bone/White pass AA. Cyan is for *accent* on dark, not body text; plum for accent on light. Verify new pairings at 4.5:1.

# TYPOGRAPHY

**Inter — everything.** One typeface, no exceptions. Hierarchy is built from **weight, size, case, letter-spacing, and color** — never a second family. Display, eyebrows, labels, and titles are UPPERCASE; body and quotes are sentence case.

## WEB TYPE SCALE

| ROLE                        | WEIGHT | SIZE           | LINE | TRACKING | CASE     |
|-----------------------------|--------|----------------|------|----------|----------|
| Display headline            | 900    | clamp(34–72px) | 1.0  | -0.03em  | UPPER    |
| Big number (price / rating) | 900    | clamp(56–88px) | 1.0  | -0.03em  | —        |
| Eyebrow                     | 500    | 11px           | 1.3  | 0.42em   | UPPER    |
| Body                        | 400    | clamp(17–21px) | 1.6  | 0        | Sentence |
| Quote (dark card)           | 400    | 18px           | 1.5  | 0        | Sentence |
| Name                        | 700    | ~15px          | 1.3  | -0.01em  | —        |
| Title / role                | 600    | 11px           | 1.3  | 0.14em   | UPPER    |

**em.key** = the one emphasized word in a headline — the only chromatic glyph in the line (cyan on dark / plum on light). One per headline.

**Web:** Inter is self-hosted (woff2, no third-party calls).

## BUTTONS & MARKS

# BUTTONS & UI MARKS

Two CTA styles. Uppercase, wide tracking, 4 px radius, one primary action per view. (Shown here in plum for light pages; on dark surfaces the same buttons use **cyan**.)

RESERVE YOUR SEAT →

Ghost — transparent + cyan/plum border & text → inverts to solid on hover. ~0.28em tracking.

RESERVE YOUR SEAT →

Solid — white bg + black text on dark → hover to transparent + cyan border/text.

## RECURRING MARKS

The small, repeated UI elements that carry the brand. No separate icon library — these are the page's signature marks.

# COMPONENTS & TREATMENTS

The repeatable building blocks, as built on the site.

## TESTIMONIAL CARD (DARK)

"BMC installs the strategy. **THE COLLECTIVE compounds it.** You stop building alone the moment you enroll."

Rebecca Jones  
CEO · CONSULTING

## RATING LOCKUP

9.8/10

RATING FROM 11,738 CEOS

## CHEVRON STAGES RIBBON

## AMBIENT WASH (BACKGROUND ONLY)

Low-opacity **purple/magenta** radial gradients behind a dark section to add depth. Background only — never on type, icons, or borders.

## ELEVATION

Borders over shadows. Bordered cards go **cyan-bordered on hover**. Flat, sharp — 4 px radius everywhere (circles only for play buttons / seals).

## MOTION

Scroll-reveal (fade-up ~28–40px) + count-up stats. Premium easing `cubic-bezier(.16, 1, .3, 1)`. No bounce/spin. Honors `prefers-reduced-motion`.

# WEB IMPLEMENTATION

The live tokens. Reference variables — never hard-code raw hex in components.

```
/* Design tokens — from the live :root */
:root{
  /* neutrals */
  --black:#0a0a0a; --ink:#141414; --surface-card:#0e0c12;
  --white:#ffffff; --bone:#f5f5f5; --silver:#b8b8b8; --muted:#444;
  /* brand — rgba(var(--x-rgb), a) for any opacity */
  --bmc-cyan-rgb:120,228,239;    --bmc-plum-rgb:75,44,106;
  --bmc-purple-rgb:156,39,172;  --bmc-magenta-rgb:214,42,143;
  --gold:#f5b301; /* review stars only */
  --radius:4px; --section-pad-mobile:72px;
}
```

## LAYOUT & SPACING

Container max **1380 px**; side padding 48 px desktop / 24 px mobile.

Sections breathe: **120–200 px** vertical on desktop (climax largest); uniform **72 px** on mobile.

Tighten and unify spacing on mobile; let desktop breathe.

## ACCENT LOGIC (LOAD-BEARING)

**Cyan on dark · Plum on light.** Functional cyan UI stays cyan on media.

## ACCESSIBILITY

Body ≥ 4.5:1. Visible focus, alt text, prefers-reduced-motion honored.

## PERFORMANCE

Self-host Inter (no third-party calls), inline critical CSS, WebP imagery, lazy below-fold media, defer video players to first scroll — keeps mobile PageSpeed in the 90s.

## ANY PAGE OR CONTEXT REFERENCING "A-TEAM"

Add whenever the term "A-Team" appears on a page. Never on core DH or BMC brand pages where A-Team is not referenced.

```
--accent: #A0252B; /* A-Team red */
em { font-style: normal; color: var(--accent); } /* color-only emphasis, no italics */
.nobreak { white-space: nowrap; } /* e.g. <em class="nobreak">A-Team</em> */
```

# EMPHASIS & WORD CRAFT

How brand phrases earn weight without italics. A single mechanic — color-shift, never font-style — applies at both headline and body-text tiers.

## RULE 1 · NEVER ITALICS

The brand never uses italics. The `<em>` element is used **semantically** to mark emphasized phrases, but its default italic is overridden. Emphasis comes from a color shift only.

## RULE 2 · EM COLOR-SHIFT

Emphasized phrases render in the brand red `--accent: #B72A30`. The accent was tuned up from the original `#A0252B` after testing: at the original luminance, red against black had only ~3:1 contrast versus white-on-black's ~21:1, which created an optical illusion where the red text read visually thinner than the surrounding white. The brighter `#B72A30` closes that gap on dark backgrounds while staying brand-correct on bone.

```
/* Em color-shift — applies to every emphasized phrase, headlines + body alike */
.subhero-title em, .collage-title em, .team-title em,
.values-title em, .beliefs-title em, .beliefs-foot em,
.recruit-video-title em, .process-title em,
.closing-headline em, .creed-quote em, .positions-header em {
  font-style: normal; /* override the browser italic */
  color: var(--accent); /* #B72A30 */
  text-shadow: /* Rule 3 — see below */
    0.4px 0 0 currentColor,
    -0.4px 0 0 currentColor,
    0 0.4px 0 currentColor,
    0 -0.4px 0 currentColor,
    0 0 0.6px currentColor;
}
```

## RULE 3 · CONTRAST-WEIGHT COMPENSATION

Even at the brighter accent, red text has lower luminance contrast against backgrounds than white or black does. The eye reads lower-contrast type as **visually thinner** at the same font-weight. The five-shadow stack synthesizes ~0.4 px of ink on every glyph edge plus a 0.6 px soft blur — roughly a full font-weight worth of apparent stroke thickness — so the red phrase reads at the same visual heft as its surrounding type. The shadows use `currentColor` so the rule works identically wherever it's applied.

## RULE 4 · PUNCTUATION PLACEMENT

Closing punctuation goes **outside** the em: `<em>Stand Beside</em>`. not `<em>Stand Beside.</em>`. Exception: when the punctuation is part of a quoted exclamation, it lives inside the em (e.g. `"<em>Hell Yeah!</em>"`).

## RULE 5 · DISTRIBUTE EMPHASIS AROUND CONNECTORS

When two emphasized phrases share a connector ("&", "and", "but"), each phrase gets its own em — the connector stays neutral. Example: Our `<em>Core Values</em>` & `<em>Attributes</em>`. The "&" reads as scaffolding, not a brand word.

## BRAND TERM PROTECTION · .NOBREAK

Multi-word brand terms (primary example: **A-Team**) must never break across lines. A single utility class enforces this:

```
/* Typography utility — phrases that must never break across lines */
.nobreak { white-space: nowrap; }
```

# CTA SYSTEM

Two button variants share identical dimensions and motion — only the paint differs. Use them deliberately based on what the page moment needs to ask of the visitor.

## .BTN-SOLID · DEMANDS ACTION

Filled — white background, black text, white border. On hover the fill drops out and the type flips. Use as the page's **primary or closing** CTA where you want maximum visual weight (closing-page conversions, the final commit-point on a posting page).

## .BTN-GHOST · INVITES WITHOUT PRESSURING

Outlined — transparent background, white text, white border. On hover the background fills white and the type flips to black. Use in **headers and secondary slots** where you want presence without demanding immediate action (subhero CTAs, ambient navigation moments).

```
/* Shared dimensions, font, padding, transition */
.btn-solid, .btn-ghost {
  display: inline-flex; align-items: center; gap: 14px;
  padding: 20px 40px;
  font-family: 'Inter', sans-serif;
  font-weight: 700; font-size: 12px;
  letter-spacing: 0.24em; text-transform: uppercase;
  text-decoration: none;
  transition: all 0.2s;
  border: 1px solid var(--white);
}
/* Only the paint differs */
.btn-solid { background: var(--white); color: var(--black); }
.btn-solid:hover { background: transparent; color: var(--white); }
.btn-ghost { background: transparent; color: var(--white); }
.btn-ghost:hover { background: var(--white); color: var(--black); }
/* Arrow nudges on hover for both variants */
.btn-solid .arrow, .btn-ghost .arrow { transition: transform 0.2s; }
.btn-solid:hover .arrow, .btn-ghost:hover .arrow { transform: translateX(3px); }
```

A page can host both: a ghost CTA in the header (low-pressure invite) and a solid CTA in the closing section (the actual conversion). On bone-background sections, invert the swatch references (solid becomes black-on-bone, ghost gets the dark outline) so the contrast logic stays the same.

Every asset that carries this mark should feel as **deliberate, restrained, and premium** as the system it comes from. When in doubt: less decoration, more space, one accent.
